Heimsaflinn 2002

World catch 2002

Heimsaflinn 93,2 milljónir tonna, Kínverjar veiða mest

Heimsaflinn óx lítilsháttar á milli áranna 2001 og 2002 og var 93,2 milljónir tonna. Mest var veitt í Kyrrahafinu og stærsta einstaka fisktegundin var Perúansjósa. Kínverjar voru stærsta fiskveiðiþjóðin á árinu 2002 en Íslendingar voru í 11. sæti heimslistans, í öðru sæti veiðiþjóða á NA-Atlantshafinu og í 11. sæti veiðiþjóða á NV-Atlantshafinu.

Heimsafli

Óveruleg aukning

Heimsaflinn á árinu 2002 var 93,2 milljónir tonna sem er óveruleg aukning frá árinu 2001 en þá var aflinn 92,9 milljónir tonna. Mest veiddist af Perúansjósu eða alls 9,7 milljónir tonna og er það 10,4% heimsaflans. Af Alaskaufsa veiddust 2,7 milljónir tonna (2,8%) og af randatúnfiski veiddust 2 milljónir tonna (2,2%). Aðrar fisktegundir náðu ekki tveggja milljóna tonna markinu. Af þeim fisktegundum sem Íslendingar veiða af þá var heimsafli loðnu tæplega 2 milljónir tonna, af Atlantshafssíld veiddust 1,9 milljónir tonna, kolmunnaaflinn var 1,6 milljónir tonna og af þorski veiddust 890 þúsund tonn.

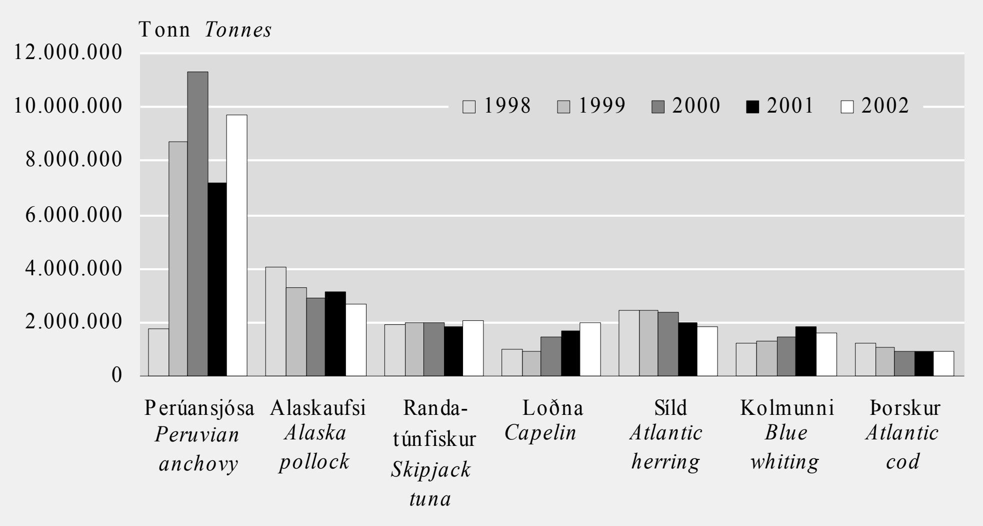
Figure 2. World wide catch of chosen species 1998–2002



Ísland í 11. sæti

Alls reyndist fiskafli 21 þjóðar meiri en ein milljón tonn á árinu 2002 og nemur samanlagður afli þessara ríkja 72,1 milljón tonna eða 77,4% af heims-aflanum. Efstir eru Kínverjar með 16,6 milljónir tonna (17,8%) en næstir þeim koma Perúmenn með 8,8 milljónir tonna (9,4%). Íslendingar eru í 11. sæti þessa lista með liðlega 2,1 milljón tonna (2,3%) og færast upp um eitt sæti frá fyrra ári.

Mest úr Kyrrahafinu

Úr Kyrrahafinu var aflinn 51,2 milljónir tonna og er það 54,9% heimsaflans en úr Atlantshafinu nam aflinn 22,4 milljónum tonna eða 24% heimsaflans. Afli úr innhöfum og stöðuvötnum var 8,7 milljónir tonna á árinu 2002 sem er 9,4% heimsaflans. Langstærstur hluti þessa afla kemur frá Asíu eða 5,7 milljónir tonna.

Translation: see table 3.

NA-Atlantshaf

Norðmenn veiddu mest, Íslendingar í öðru sæti

Á árinu 2002 reyndist heildarafli úr Norðaustur-Atlantshafi vera 11 milljónir tonna og er það áþekkt magn og á árinu 2001. Mest kom í hlut Norðmanna eða 2,7 milljónir tonna (24,6%) en hlutur Íslendinga var 2,1 milljón tonna (19,2%). Nokkru minni var afli Dana, 1,4 milljónir tonna (13%) og hlutur Rússa var 1,1 milljón tonn (10,1%). Afli annarra ríkja náði ekki einni milljón tonna.

Mynd 4. Heildarafli einstakra ríkja í NA-Atlantshafi 2002

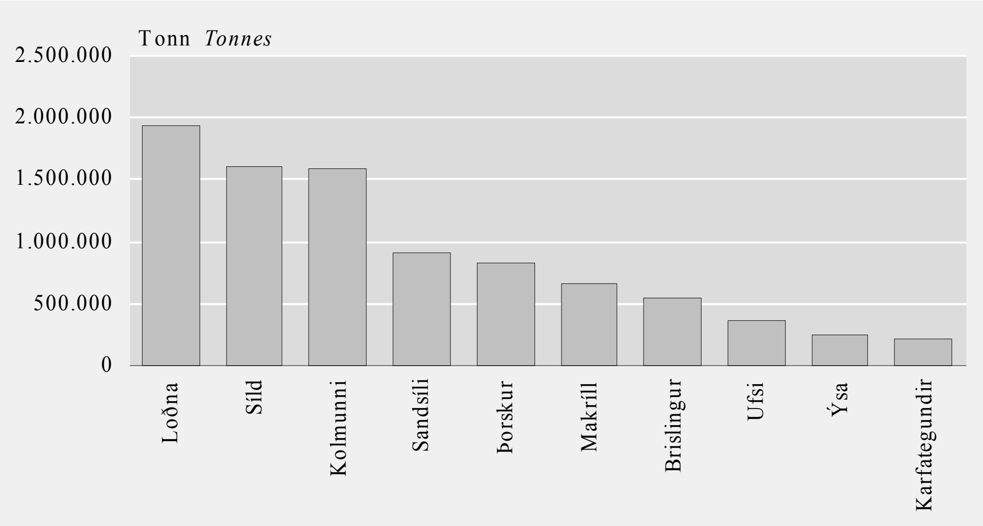
Translation: see table 5.

Mest veitt af loðnu

Tegundir uppsjávarfiska eru fyrirferðarmestar í samsetningu afla af þessu hafsvæði. Mest veiddist af loðnu eða 1,9 milljónir tonna (17,6%) en ekki langt undan kom síldaraflinn sem var 1,6 milljónir tonna (14,6%) og kolmunnaaflinn var tæpar 1,6 milljónir tonna (14,4%). Afli annarra fisktegunda náði ekki einni milljón tonna. Af botnfisktegundum veiddist mest af þorski eða 835 þúsund tonn og 370 þúsund tonn veiddust af ufsa.

Mynd 5. Tíu helstu fisktegundir í Norðaustur-Atlantshafi 2002
Figure 5. Ten most significant species in the Northeast Atlantic 2002



Translation: see table 6.

NV-Atlantshaf

Bandaríkin veiða mest

Alls veiddust rúmlega 2,2 milljónir tonna af þessu hafsvæði á árinu 2002 og er það nánast sama magn og á árinu 2001. Sem fyrr eru það Bandaríkjamenn og Kanadamenn sem eru í algjörum sérflokki hvað varðar aflabrögð á þessu hafsvæði. Afli Bandaríkjamanna var tæplega 1,1 milljón tonn (48,5%) og afli Kanadamanna var 842 þúsund tonn (37,5%) en afli annarra ríkja var mun minni. Afli Íslendinga var 6.877 tonn, einkum rækja og skipar Ísland 11. sæti á lista fiskveiðiþjóða á þessu hafsvæði.

Mest veitt af skelfiski

Af afla einstakra fisktegunda er helst að geta að mest veiddist af hafdiski, sem er hörpudisktegund, eða 280 þúsund tonn, af síld veiddust 259 þúsund tonn og litlu minna af rækju eða 258 þúsund tonn. Skel- og krabbadýraafli er reyndar mjög einkennandi fyrir fiskaflann af þessu hafsvæði.

English summary

The world catch grew slightly between the years 2001 and 2002 and amounted to 93.2 million tonnes. The biggest catch was in the Pacific Ocean or 51.2 million tonnes which is 54.9% of the total world catch. The total catch from the Atlantic Ocean was 22.4 million tonnes or 24% of world catch. The most significant species caught in 2002 was Peruvian anchovy, a total catch of 9.7 million tonnes or 10.4% of the total world catch. Alaska Pollock came second with a total catch of 2.7 million tonnes. China was the biggest fishing nation in 2002 with a total catch of 16.6 million tonnes or 17.8% of world catch and Peru came second with 8.8 million tonnes. Iceland was number 11 on the world list with 2.1 million tonnes or 2.3% of the total world catch.
