## Explanatory notes and references

References are quoted for data originating outside Statistics Iceland.

**GDP growth rate, %.** Change in the volume of gross domestic product each quarter as compared with the same quarter of the previous year. Seasonally adjusted growth rate is also presented, showing quarterly growth on previous quarter.

**Consumer price index** and **Consumer price index less housing cost**. May 1988=100. Price collection takes place for at least one week in the middle of a month (from January 2008 onwards). Until year 2007 the prices were collected the first two weekdays of the month. Yearly averages are converted by middle month indices.

**Harmonized index of consumer prices.** 2005=100. The harmonized index of consumer prices (HICP) is compiled for all EEA-member states. It differs in scope from the Icelandic CPI. The main difference is that imputed rent for owner occupied housing is included in the Icelandic CPI but not in the HICP. On the other hand, expenditure of foreign visitors in Iceland and expenditure of people living in hospitals and similar institutions are included in the HICP but not in the Icelandic CPI.

**Building cost index.** June 1987=100. The index is compiled at the middle of each month.

**Producer price index.** 4<sup>th</sup> quarter 2005 = 100. The producer price index measures changes in prices received by producers for their products.

**Fish catch, volume index.** The volume index is an annual chain-linked index, having the monthly average of 2004 as a reference period. The base year each time is T-2.
