

„The aim of my Master's studies at RU was to acquire a recognised international business education and to develop a solid network of contacts. Factors which would benefit me and enhance my status on Icelandic and international employment markets. I had high expectations for the programme, and I was not disappointed. Memorable aspects of the programme include the skill and positivity of instructors and the service attitude of employees. Following my studies, I began work at KPMG auditing. The collaboration of students and a demanding and progressive curriculum have fitted well with my work at the company.”

*Kristinn Bjarnason,
MSc Corporate Finance*

„Reykjavik University was the only school I ever considered for my graduate studies. The structure of the Master's programme in Finance enables students to pursue it alongside work if they put forth the necessary effort. RU has managed to attract highly skilled and enthusiastic instructors, including instructors from renowned universities from all over the world. The programme has already been of considerable use to me in my work as a financial director, and I am convinced that it will further support me in the future.”

*Anna Lilja Pálsdóttir,
MSc Corporate Finance*

MASTER OF FINANCE

CORPORATE FINANCE
INVESTMENT MANAGEMENT

DEAN'S WELCOME

A warm welcome to the School of Business at Reykjavík University!

The Master's programme in Finance at Reykjavík University is unique in Iceland. Taught in English, the programme offers an outstanding international learning experience in the beautiful surroundings of Reykjavík. The programme motivates students to excel in every subject they are studying, with the help of an excellent learning environment in the new state-of-the-art facilities of the university. The curriculum is delivered by distinguished resident faculty, and visiting professors from leading international business schools, all of whom bring their superior knowledge, expertise, and experience into the classroom.

Perhaps the most outstanding feature of the programme is the approach to teaching and learning, which emphasises professional development of the students. Thus, academic study is integrated with methods that simulate tasks that graduates will encounter in the workplace. While pursuing different subjects and knowledge in finance, students also engage in a variety of team-oriented projects, and apply analytical abilities in hands-on problem-solving and decision-making.

Enjoy your tour of the Master's programme in Finance at Reykjavík University!

Friðrik Már Baldursson, PhD
Dean
School of Business
Reykjavík University

Introduction of the RUSB Master's programme in Corporate Finance and Investment Management.

With the world in a financial turmoil, solid finance education marks its importance. We take advantage of our location in the middle of the Atlantic and offer our students knowledge and experience from two continents, so they may experience the best of both worlds; Europe and America. Armed with our international faculty members from renowned universities, such as CBS, IESE, LBS, BU and others, our students develop insight and receive rigorous training in the fields of corporate finance and investment management which prepares them to successfully meet and tackle the challenges of the world of finance today. Drawing from one of the steepest learning curves taken on by any nation from the collapse of the financial system, our students benefit from the lessons learned and experience first hand the build-up of a new financial and economic system.

We welcome you to take the ride with us; through the exciting and enlightening time of reinvention of the financial world, whilst you prepare yourself to meet the challenges it will bring.

On behalf of the Reykjavik University Master's programme in Finance,

*Gudrun Johnsen,
Assistant Professor and Academic Advisor to the programme.

WHY FINANCE AT REYKJAVIK UNIVERSITY?

In a world where the destiny of individuals and nations alike is decided by flows of funds, post-graduate education in finance gives those who head for a career in business a competitive edge. Today's world of business demands quantitative acumen, but at the same time thorough understanding of human behaviour and psychological biases. Finance is the only field providing training in such a diverse set of subjects.

MASTER OF CORPORATE FINANCE

MCF (90 ECTS)

Focuses on developing careers for students in corporate finance, e.g. as CFOs, corporate finance specialists, financial analysts, financial consultants, and investor relations professionals.

This course of study is particularly suited for people who wish to work in corporate management, be it general administrative work or financial management.

MASTER OF SCIENCE IN CORPORATE FINANCE

MSC (120 ECTS)

In order to acquire a M.Sc. degree in Corporate Finance students need to engage in a 30 ECTS research project under the supervision of a faculty member which is estimated to last for the equivalent of one additional semester's work. This is optional for students interested in further studies leading to a PhD degree.

MASTER OF INVESTMENT MANAGEMENT

MSIM (90 ECTS)

Focuses on developing careers for students in investment management, e.g. as fund managers, financial analysts, risk managers, traders, asset managers, and pension fund officers. This course of study is especially suited for those who aim for a career as specialists at financial institutions, large-scale investors, such as pension funds, or as consultants.

MASTER OF SCIENCE IN INVESTMENT MANAGEMENT

MSC (120 ECTS)

In order to acquire a M.Sc. degree in Investment Management students need to engage in a 30 ECTS research project under the supervision of a faculty member which is estimated to last for the equivalent of one additional semester's work. This is optional for students interested in further studies leading to a PhD degree.

PROGRAMME STRUCTURE

90 ECTS, 1,5 YEAR
120 ECTS, 2 YEARS

Each programme consists of three core courses per term and a number of electives to choose from. A standard course is 7,5 ECTS units. Classes are held Thursdays, Fridays and Saturdays. Some courses are held Monday through Wednesday from 16:35–19:50. Most courses are taught in English. Full-time study consists of four courses per semester, for three semesters, twelve in total.

BOSTON STUDY TRIP

Every spring there is a study trip to Boston where a professor from Boston University welcomes the group of students, teaches a finance course, and takes the group on company visits.
