1 INNGANGUR

Undanfarinn áratug hafa Orkuspárnefnd og Orkustofnun unnið að því að koma á greiningu raforkunotkunar niður á svokallaða notkunarflokk. Nú er svo komið að meirihluti rafveitna hér á landi hefur tekið upp þessa flokkun, þ.e. eftirtaldar veitur:

Rafveita Hafnarfjarðar
Rafmagnsveita Reykjavíkur
Rafmagnsveitur ríkisins
Rafveita Akraness
Rafveita Borgarness
Orkubú Vestfjarða
Rafveita Sauðárkróks
Rafveita Akureyrar
Rafveita Húsavíkur
Bæjarveitur Vestmannaeyja

Þessar veitur hafa notað þessa flokkun mismengi, sumar frá árinu 1983 en aðrar styttra. Viðskiptavinir þessara veitna nota yfir 85% af heildarraforkunotkun landsmanna ef stóriðjan er ekki talin með. Eftirtaldar veitur hafa ekki tekið upp þessa flokkun en flestar þeirra munu væntanlega gera það á þessu ári:

Hitaveita Suðurnesja
Rafveita Siglufjarðar
Rafveita Reyðarfjarðar
Selfossveitur
Rafveita Eyra
Rafveita Hveragerðis

Hér að aftan eru töflur sem sýna hvernig notkunin hjá veitunum hefur þróast frá því farið var að flokka notkunina á þennan hátt. Hjá Rafmagnsveitu Reykjavíkur og Rafmagnsveitum ríkisins er ekki bara sýnd heildarnotkunin heldur er hún einnig greind niður á undirsvæði.

Einnig er í kafla 10 tafla þar sem tekin er saman notkunin árið 1989 hjá öllum veitunum. Aftast eru síðan taldir upp allir notkunarflokkarnir en nánari skýring á þeim er að finna í skýrslu Orkuspárnefndar: "Leiðbeiningar um flokkun raforkunotkunar", OS-89033/OBD-02.
