OS82008/VOD06 B

Janúar 1982

AÐFARAORÐ

Skilagreinin þarf fárra skýringa við.

Mánaðarrennslið ($M_m Q$) er í m^3/s og því áður útgefið í hinum árlegu Rensslisskýrslum. Hér er brugðið til þeirrar nýlundu að raða vatnsföllunum eftir landshlutum. Þessi skilagrein nær til vatnsfalla á Austurlandi. Samtímis þessari skilagrein senda Vatnamælingar frá sér skilagreininna „Langtímamánaðarrennsli íslenskra vatnsfalla - meðaltöl og staðalfrávik -“ enda gera Vatnamælingarnar ráð fyrir að notanda mánaðargilda fýsi að kynna sér staðalfrávik.

Vatnamælingum er hugleikið að fá að vita, hvort þessi túlkun og framsetning vatnafræðigagna er hagkvæm notendum, t.d. þeim sem við virkjanarannsóknir og áætlanir fást.
