# FORMÁLI

Á undanförnum árum hefur verið unnið að því hjá jarðhitadeild Orkustofnunar að safna saman greinum og bæklingum, sem beint eða óbeint fjalla um jarðhita, nýtingu jarðvarma og skyldar greinar. Þetta safn hefur vaxið með árunum og því skapazt þörf á að raða því kerfisbundið til að auðvelda notkun þess. Sú greinaskrá, sem hér liggur fyrir, er fyrsta tilraun til þessa. Greinunum er raðað í flokka eftir spjaldskrá jarðhitadeildar og í stafrófsröð höfunda innan hvers flokks. Hver grein hefur sitt númer, sem hægt er að finna hana eftir í safninu.

Skráin er að mestu leyti unnin af Gunnari Höskuldssyni hjá jarðhitadeild. Hefur hann notið mjög góðrar aðstoðar Ingólfs Sigurðssonar hjá Skýrsluvélum ríkisins og Reykjavíkurborgar, sem hefur gert röðunarforskrift fyrir skrána.

Þótt reynt hafi verið að vanda sem bezt til skrárinnar, er þó vafalaust margt, sem betur mætti fara. Eru allar ábendingar þar að lútandi vel þegnar.

Guðm. Pálmason
