**ARCTIC**  
SERVICES

# Arctic Services

Arctic Services is a joint initiative by companies and institutions in the Akureyri region, in the north of Iceland. It was founded as a common platform for industrial and technical services providers, research facilities, engineering companies, aviation services and public utilities in the area.

# Our objective

The main objective of Arctic Services is to promote the high service level and infrastructure available for those involved in exploration, oil search and mining in the Arctic region.

# The region

The Akureyri region is the most densely populated area in Iceland, outside of the capital area. It has all the amenities, leisure facilities and service and professional companies that can be found elsewhere in the world – albeit at a higher latitude.

The region's geographic location is central to Arctic operations. It offers a vibrant local economy, a modern, international airport, excellent harbour facilities and extensive possibilities for expansion.

# Getting here

Akureyri is well connected, including flights to and from London (around 2.5 hours), Copenhagen (2.5 hours) and Constable Point (1.5 hours). There are up to 10 scheduled flights a day to Reykjavik, lasting 45 minutes.

## AKUREYRI

With 18,000 inhabitants, Akureyri is by far Iceland's most populated town outside of the capital area. Full of cafés, restaurants and activities, it remains small enough to offer the quiet of the countryside. Striking the balance between town and city, it is a favourite among tourists, both foreign and Icelandic.

### Activities and facilities

Akureyri has hotels and restaurants to suit all tastes, and an unlimited range of activities and attractions, including:

- one of the northernmost 18-hole golf course in the world
- geothermal swimming pools
- museums – ranging from modern art to folk museums
- outdoor activities – such as skiing, horseback riding and sea angling
- sightseeing excursions
- hiking and guided walks
- farm visits
- local food
- off-shore activities – such as whale watching and sailing
- a vibrant night life

It takes about 10 minutes to drive from the city centre to the most popular ski area in Iceland, Hlídarfjall Ski Resort.

### Food and accommodation

Akureyri offers:

- 15 full service restaurants (with capacity of around 2000 seats)
- 14 cafés – as well as bars, music clubs and discos
- 5 hotels (with capacity of 424 rooms during summer and 220 rooms during winter)
- a range of apartment rentals
- three all-year country hotels within a short drive (with 75 rooms)

Hof Cultural and Conference Centre (inaugurated in 2010) also offers excellent facilities for events of various kinds, including conferences, meetings, receptions, parties and concerts.

### Climate and surroundings

Akureyri is surrounded by mountains reaching 1000–1500 m. The Arctic Circle is only 60 km north of Akureyri but the climate is mild, with summer temperatures up to 25°C and winter temperatures averaging around 0°C. Some of Iceland's best natural treasures are within easy reach.

### Travel options

Akureyri International Airport offers up to nine daily scheduled flights between Reykjavik and Akureyri, which take 45 minutes, and direct flights from Copenhagen during the summer.

It takes about 4–5 hours to drive from Reykjavik to Akureyri.

[www.akureyri.is](http://www.akureyri.is)

AKUREYRI IS THE SERVICE BASE FOR ALL OF NORTH ICELAND REGARDING SMALL AND LARGE INDUSTRIES, HEALTH CARE, CULTURE, SHOPPING, BUSINESS AND BANKING. THE TOWN ITSELF HAS EVERYTHING YOU COULD THINK OF AND IS LOCATED JUST A STONE'S THROW AWAY FROM SOME OF ICELAND'S MOST FAMOUS NATURAL TREASURES.

## THE UNIVERSITY OF AKUREYRI

Founded in 1987, the University of Akureyri (Háskólinn á Akureyri) has built a reputation for academic excellence and good industrial relations. The university has been instrumental in the economic growth of North Iceland and is central to the future planning of the area as a knowledge-based society.

### Educational services

We prepare students for a wide range of opportunities in both the private and public sectors. Education at the university covers specific skills and scientific methods, as well as more theoretical skills that will enable graduates to improve their qualifications. Education and research are closely coordinated and course work is based on research wherever possible.

### University details

**Founded by the establishment of Faculties of Health Sciences and Industrial Management, the university is divided into three Schools:**

- School of Business and Science
- School of Humanities and Social Sciences
- School of Health Sciences

### Laboratory facilities

The laboratories at the university are well housed and equipped for teaching and research in chemistry, biology, microbiology, genetics and physics.

The number of students is around 1600 and there are around 180 members of staff.

## AKUREYRI HOSPITAL

Akureyri Hospital is a multidisciplinary hospital serving North and East Iceland. It is also Iceland's back-up hospital.

The accident and emergency ward is open 24 hours a day and treats all accidents and more serious illnesses.

### Staff and facilities

Around 600 members of staff are employed, 55 of whom are specialists in the main medical specialities.

#### Our facilities include:

- 3 fully equipped operating theatres
- an intensive care department
- a radiology department with state-of-the-art equipment (CT, MRI and ultrasound)
- a well-equipped laboratory department

### Education

As a teaching hospital, clinical education in various fields within the healthcare sector for the University of Akureyri and the University of Iceland is provided.

### Akureyri Air Ambulance Service

Akureyri is the centre for air ambulance services in Iceland. These flights are staffed by emergency medical technicians/paramedics and flight physicians where necessary. The air ambulance services arranges medical flights in Greenland as requested.

### Aircraft

The aircraft, King Air B200, carries state of the art medical equipment on board.

The air medical flight service can provide everything from basic to critical care and neonatal transport.

# THE PORT OF AKUREYRI

Akureyri is at the end of Eyjafjordur – the longest fjord in Iceland. The fjord is narrow (around 6–10 km wide and 60 km long), and is surrounded by mountains. The sheltered stretch of water at its end (Pollurinn) is the perfect location for a harbour.

## Existing facilities

Pier	Length	Draft	Upland
<b>Oddeyrarbyggja</b>	220 m	10m	N/A
<b>Tangabryggja</b>	170m	10m	2ha
<b>Versturbakki</b>	170m	9m	1 ha
<b>Oil terminal A</b>	80m	9m	1 ha.
<b>Oil terminal B</b>	80m	10m	1 ha

## Future facilities: Dysnes area 2013–2016

Dysnes area is only 16 km. out of Akureyri in the middle of Eyjafjordur

- 60 ha on the planned industrial area
- the potential of 30 ha on landfill
- a possible depth of up to 30m

The master plan and local plan will be ready in early 2013 and construction will also be able to start in 2013.

Port of Akureyri is your Arctic Service Center.

# EIMSKIP – COOL CHOICE IN LOGISTICS

Eimskip is a leading logistics company offering comprehensive transportation services in the North Atlantic. Our services are based on a reliable and efficient system with a focus on exceptional service.

We have offices in 18 countries, and agents in strategic locations relating to other important ports. The transport network consists of cargo handling, warehousing, management, and information flow, enabling our customers to focus on their own business while Eimskip finds the best solutions on land, sea and air.

### Import/Export

- Project cargo and larger operations
- FCL & LCL distribution
- Temperature controlled transportation

We have strengthened our liner operations in the North Atlantic with new vessels, bringing increased capacity and frequency to Eimskip's customers.

Eimskip forms an extensive and uninterrupted transport chain from sender to recipient.

# OLIUDREIFING

Oliudreifing is the largest distributor of liquid fuel in Iceland, operating a network of oil terminals, trucks and a boat. We also run a specialised workshop, servicing gas stations and depots.

### Staff

Our staff are specially trained to work in hazardous environments and have received extensive pollution prevention and clean-up training.

### Our services and projects include:

- selling a wide variety of equipment to the local oil industry
- collecting waste oil, including the comprehensive treatment of collected oil into usable fuel
- the Environmental Agency of Iceland – our staff are the agency’s operational response team in oil pollution incidents at sea, in cooperation with the agency and the Coast guard
- a research programme in cooperation with Nordic companies – introducing electrofuels, such as Methane, Methanol and DME, as a substitute for conventional fuels

### Safety

Oliudreifing’s primary concern is safety and the environment. We operate in accordance with the ISO 14001 and OHSAS 18001 standards, and the ISO 9001 quality standard. Our head office, distribution system and waste oil treatment system are certified to fulfil the ISO 9001:2008 quality standard.

# AKUREYRI SHIPBROKERS

Akureyri Shipbrokers is a fully integrated ship brokerage firm, servicing all modern shipping requirements - from vessel sales and purchases to agency services.

We offer a team of qualified professionals, and our attending agents combine maritime qualifications with extensive experience in the industry.

**The shipbrokers** handle the buying and selling of new or existing ships, valuing vessels and providing consultancy services

**The port agency** activities include:

- arranging technical and repair services
- crew changes
- sludge removals
- clearance of spares
- supply of bonded stores and provisions
- loading and discharging

We also arrange special services for the fishing fleet, such as valuing and organising trade of their catches and quality inspections of the products and ships facilities.

# SLIPPURINN AKUREYRI

## Our team

Our experienced team has the skills and knowledge to execute all projects with exceptionally high quality. The yard employees are steel workers, mechanics, certified welders, engineers, carpenters and general workers. We also have excellent partnerships with numerous sub-contractors to ensure a service that meets our customers' needs.

Over the past year, Slippurinn has also been taking on a number of overseas projects – from Canada, Greenland, Norway, Russia and more – and our team are therefore well used to servicing foreign companies.

## Equipment and facilities

We are well-equipped with both general tools of the trade and special tools to ensure excellent services that fulfil the needs of our customers. Slippurinn has access to 7,600m<sup>2</sup> of housing as well as a floating dock, slipways and a 300 m long repair quay.

## Floating dock/slipway – technical specifications

	Length (meters)	Width (meters)	Depth (meters)	Lifting capacity (tonnes)
<b>Floating dock</b>	122.0	23.3	7.8	5,000
<b>Slipway 1</b>	80.0	12.0	6.8	1,500
<b>Slipway 2</b>	40.0	9.0	5.0	150

The company's financial status is very good and was recognised by CREDITINFO last year as one of the soundest companies in Iceland.

## KÆLISMIDJAN FROST

For decades, Kaelismidjan Frost (or Frost), has specialised in designing, installing and maintaining refrigeration systems, both industrial and commercial. Our main focus has been the design and installation of industrial refrigeration systems, both on board vessels and land-based.

### Extensive international experience

In recent years, Frost has had extensive experience in working in an international environment, including China, South America, Russia, Africa, Norway, Denmark, the Faroe Islands and elsewhere. Projects have involved the design and installation of refrigeration systems on board ships, with a capacity of 50 to 300 tonnes per 24 hours, and in land-based plants with a capacity of 50 to 1000 tonnes per 24 hours.

### Company details and staff

Frost has its main offices in Akureyri and a branch office in Reykjavik. The company's turnover in 2012 was around USD 15m. The company employs around 40 staff, including engineers, mechanics, specialists in refrigeration technology and welders certified by Lloyd's Register.

### International certification

Frost is well prepared to undertake any type of project involving refrigeration systems, or any form of piping system for industries that need to fulfil the requirements of international certification entities.

# RAFERYRI

## Rafeyri – versatile electrical services

Rafeyri offers comprehensive services in electrical engineering, including design, installation and maintenance. Reliable and versatile, our team of experienced professionals works with the newest equipment and technology. We also offer facilities to industrial, marine, and domestic customers.

### Our services include:

- electrical cable installation
- industrial computers PLC
- motor and generator repair
- electrical layout, design, and drawings
- electrical switchboard construction
- lighting design and calculation
- full service maintenance on electronic and electrical components

Since the beginning we have provided services to the fishing fleet, with its many and varied challenges. High voltage current, design and drawings are an important part of our business.

### Staff

Founded in 1994 by a group of six, we now employ 50 people representing a broad range of trades, including engineers, electrical engineers, electricians and industrial electricians, mechanics, and mechanical engineers.

### 'We can do It!'

Our motto – **We can do It!** – derives from the exceptional breadth of skills and experience at Rafeyri. We also collaborate with various companies and designers on a range of projects, which involves us in ever larger and more demanding work. The companies we have worked with include: Slippurinn Akureyri, Raftakn, Kaelismidjan Frost and Verkis.

## RAFMEINN

### Energy from the North

Rafmenn is a market-leading company providing electrical and telecommunication services. Based in the northern Eyjafjörður region, we recently celebrated our 15th anniversary.

### Our team

We have 29 employees, consisting of highly experienced electricians, electronics engineers and electrical and telecommunication technicians. The company is owned by father and son team Johann Kristján Einarsson, Master Electrician, and Arni Pall Johannsson, Business Administrator.

### Our services include:

- new wiring
- maintenance and replacement of old wiring
- fire systems
- sound systems
- remote control lighting systems
- access control systems
- television systems
- repair of motors, such as diesel power generators and home appliances
- management of high tension power sources
- telecommunication services, including copper lines, fibre-optic cables and microwave connections

### Projects

We take on a wide variety of projects. Completed projects include:

- two tunnel projects, in Hedinsfjörður and Almannaskard – new wiring
- Logmannshlid, a 45 unit nursing home – new wiring
- Buseti, a 58 unit residential complex – new wiring
- work camp and high tension for Impregilo at Karahnjúka Dam
- work camp and high tension for Metrostav/Hafell at Hedinsfjörður tunnel project
- aluminium plant at Reydarfjörður (Bechtel) – various projects
- service contracts with RUV, Mila, Siminn, Vodafone and the 112 Emergency service

# AKUREYRI INTERNATIONAL AIRPORT

Akureyri International Airport is open all year. There are daily flights to Reykjavik and good connections to other destinations in Iceland, according to the schedules of Air Iceland (Flugfélag Ísland) and Norlandair.

## Chartered flights

Chartered flights are available to destinations in Iceland and overseas, with travel agencies offering direct flights to several destinations. Norlandair is responsible for chartered flights to Greenland.

Duty free shopping is available for international travellers with a wide range of goods on offer.

## Other services

The airport also provides the centre for ambulance and emergency flights within Iceland. Akureyri Aviation Academy (Flugskóli Akureyrar) is also based at the airport.

## Technical information

- Akureyri International Airport has one runway, which is 2400 m x 45 m and can safely accommodate the largest airplanes.
- Approach control equipment and lighting include LOC, ILS and GPS approaches.
- Fire and rescue services at the airport are in accordance with CAT 5 and can be raised to CAT 7 on request.

## Further information

Further information can be found in AIP (The Aeronautical Information Publication), see

<http://www.isavia.is/english/c/aip/>

THE AIRPORT IS OPEN  
ALL YEAR ROUND AND  
IS ALSO A CENTRE  
FOR AMBULANCE AND  
EMERGENCY FLIGHTS  
IN ICELAND AND  
GREENLAND

## NORLANDAIR

Norlandair provides aviation services in the challenging environment of the Arctic, including both charter and scheduled flights. We also offer services such as: complete logistical services (including procurement of goods), survey flights, medevac flights and SAR service (search and rescue).

### Our fleet - Norlandair's aircraft fleet includes:

- **Three De Havilland Twin Otters**
  - each can be configured with 19 seats
  - can be equipped with skis, for landing on snow or ice, and balloon tires that can operate on rough terrain
  - specially fitted with antennas for different scientific instruments, bubble windows, camera holes, etc., for conducting survey flights.
- **Beechcraft King Air 200**
  - seats up to seven passengers
  - equipped with pressurised cabins, certified up to 28,000 feet, and turboprop engines
  - capable of operating from shorter runways than any aircraft in its class
  - has the necessary life support equipment for ambulance flights.

Norlandair can also facilitate other aircraft types if required, e.g. **Dash 7/8, Fokker 50, Antonov 12** and **Hercules C130**.

### About Norlandair

Founded in 2008, Norlandair is built on the long experience and know-how of a company of the same name that dated back to 1974. Our customers are mainly Danish public institutions and metal and oil exploration companies. Despite our relative young age Norlandair was recognised by Creditinfo as one of Iceland's strongest companies in 2011.

## ARCTIC MAINTENANCE

Arctic Maintenance is an approved EASA part 145 maintenance organization for aircrafts located at Akureyri International Airport.

### Staff

We employ nine highly trained B1, B2 and C aircraft maintenance technicians, as well as three additional employees with decades long experience in aircraft and helicopter maintenance. Our staff has extensive experience of working in Greenland in both winter and summer conditions and under demanding circumstances.

### Services and facilities

Arctic Maintenance can provide its customers with repairs to most types of aircraft, including maintenance planning, spare parts purchases, heavy and line maintenance. We are equipped with all the tools and machinery necessary to undertake aircraft repairs.

Our premises and facilities are exceptional and we can house medium sized aircraft and all types of helicopters.

We are ready to assist our customers with anything they need and no project is too large for us.

WE ARE READY TO ASSIST OUR CUSTOMERS WITH ANYTHING THEY NEED AND NO PROJECT IS TOO LARGE FOR US

## NORDURFLUG

Nordurflug is Iceland's premier helicopter operator. We have the largest fleet in Iceland and an impressive market share. We operate a fleet of elegant black-liveried helicopters, and can comfortably accommodate 3-8 passengers in the largest twin rotor aircraft. Our experienced staff has performed demanding tasks in Greenland. Tasks to date have been within the mining sector and the local infrastructure and all tasks have been completed successfully. Norðurflug is aware that critical projects like mining need extra care, attention and planning to be successful. Working in Greenland demands that all the supporting functions including maintenance has to be ready to act as needed.

## MYFLUG AIR

### The Company:

Myflug Air is an Icelandic airline which offers a wide variety of aviation related services including; charter-, sightseeing-, ambulance- and calibration flights along with special missions such as air drops, photography flights and VIP transportation.

The airline has been operating from 1985 and has gained extensive experience in flight operations within Iceland and to neighbouring countries, mainly Greenland and the Faroe Islands. It was the first airline in Iceland to be approved by EASA standards and also the first to operate a dedicated air ambulance aircraft in accordance with a contract made with the Icelandic government.

The headquarters are located in Akureyri, with a secondary base of operation in the capital of Iceland, Reykjavik.

## ISLANDSBANKI

Íslandsbanki offers comprehensive financial services to households, corporations and professional investors.

### Outstanding service

Our network is devoted to providing outstanding service. We offer open access to customer representatives and business managers, who work closely with our clients to solve the diverse financial needs of our business partners.

We have a strong market share across all domestic franchise areas: Retail Banking, Corporate Banking, Capital Markets and Wealth Management.

### Branches

Íslandsbanki operates a diverse and efficient branch network with 20 branches strategically based in the Reykjavik metropolitan area and in larger towns across the country.

### Seafood and energy

Building on a heritage of lending to industry in Iceland, we have developed specific expertise in two industry sectors: seafood and energy. Together these form the basis for our overseas strategy. With our focused approach in these fields, Íslandsbanki offers valuable services to industry players and investors.

### History

Íslandsbanki is built on a solid heritage of banking, with roots extending back to 1875, supplying financing to the Icelandic industrial and fisheries sectors. Itself the product of a merger, Íslandsbanki has been instrumental in the consolidation of the Icelandic banking sector for decades.

## RAFTAKN

### Who we are

Raftakn is an electrical engineering firm that has been operating for 36 years. In nearly four decades we have gathered advanced knowledge and wide experience. Whether the project is designing electrical installation for a small house or PLC programming and SCADA systems for a big power plant, our staff is ready and able to take on the task with devotion and ambition. Our staff include engineers, technicians and technical draftsmen.

### Services we provide

In automation designing, PLC programming and SCADA systems for industrial and service companies such as fish drying and fish processing plants, power plants, both hydro and geothermal, infrastructural buildings and facilities incl. geothermal water distribution, is a significant part of the companies projects, along with project management and control, planning and cost estimation. Raftakn is certified Siemens solutions partner.

In the construction sector, we also design projects for public bodies, companies and individuals, including, concert halls, schools and sport facilities, factory premises, hotels and residential houses. Design of electrical utilities, lighting design and programming of building management systems for large and small installations, including traffic structures, such as tunnels, ports and airports.

In telecommunications, the design of utilities for fixed telephone systems, fibre optic systems and mobile telecommunications in connections with our PLC and SCADA project.

### A few of our projects

- Hellisheidi Geothermal Power Plant, programming and installation of control system.
- Isfelag Vestmannaeyja in Thorshofn, PLC and SCADA systems for freezing plant, fish drying and fishmeal factory.
- Hedinsfjordur road tunnel, design and PLC programming of electrical installation systems and telecommunications.
- Approach lights for Akureyri international airport, including PLC control of strobe lights for the runway.
- Hof cultural building in Akureyri, electrical systems, lighting design, sound systems and building control system.

# VERKFRAEDISTOFA NORDURLANDS

Verkfraedistofa Nordurlands, VN consulting engineers, specialises in the fields of environment, construction and mechanical engineering.

### Our projects include:

- building construction
- utilities systems
- drainage systems
- environmental issues
- road-works
- harbour construction
- smaller power stations
- specialised sports facilities

Our work includes preliminary investigations, feasibility studies, design, management of tenders, supervision, cost estimates, surveying and more.

### Our team

We have a staff of 14, consisting of experienced designers, project managers and experts in the fields of load-bearing capacity, utilities, urban technology, transport infrastructure, power plants, surveying, geology and environmental issues. We focus on close cooperation with buyers and working towards established goals in deadlines, costs and achievement.

### Projects

Projects range from tents to sports facilities, from hiking paths to main roads, from underpasses to tunnel portals, from car parks to airport runways and aprons, and many more.

Our more specialised projects include preparations for, and design of, smaller power plants and hydro turbines. For example, we designed the machinery for three micro power plants in Greenland and the machinery was built in a mechanical workshop near Akureyri.

CONSULTING ENGINEERS  
SPECIALISING IN THE  
FIELDS OF ENVIRON-  
MENT, CONSTRUCTION  
AND MECHANICAL  
ENGINEERING

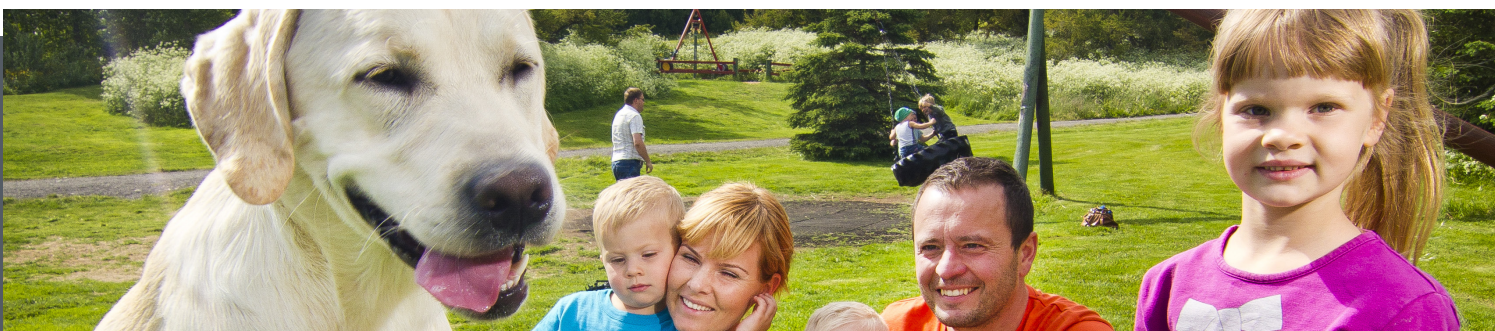

### Merger

VN and Efla consulting engineers merged in the beginning of 2011. After the merger the firm can offer an even greater range of services than before, particularly in the field of structural geology, high-voltage lines and environmental issues.

# MANNVIT

Mannvit is Iceland's largest engineering and project management company, offering comprehensive engineering, management and EPCM services.

### Our team

Mannvit boasts experts across most engineering disciplines, with direct project experience from the downstream oil & gas and power intensive industries in Iceland. This experience helps our clients reduce risk and significantly streamline projects.

### Projects and services

Our involvement spans the full range of consulting services, including:

- EPCM/project management
- Fire safety
- Construction management
- Oil and gas engineering
- Work camps and utilities
- Bridge and harbor engineering
- EIA
- Environmental research and monitoring
- Planning, permitting and preliminary studies
- Design of structures and equipment.

Projects include: oil terminals, harbors, airports, bridges, roads, underground gas pipelines, wastewater engineering, power transmission and distribution.

## VERKIS

With decades of experience, Verkis provides comprehensive, high quality, innovative, and technically advanced services in all fields of engineering and related disciplines – for all aspects of industrial, municipal and infrastructure development.

### How we work

We will take you all the way from conceptual design, environmental assessment and feasibility studies, through detail engineering and design, to commissioning and project closeout. We have experience of a wide variety of projects, such as geothermal and hydro power plants, infrastructure projects, and a variety of buildings and industrial facilities.

### Projects

Verkis has participated in the engineering of most of Iceland's biggest construction projects, covering disciplines such as civil and structural design, mechanical engineering, electrical HV, MV, and LV engineering, systems engineering, automation and control.

**We have worked on projects around the world, including three hydropower plants in Greenland in recent years.**

### Staff and services

Our highly qualified and experienced staff will assist you in all or any of the following disciplines: Project Management and EPCM, Cost Estimation and Planning, Engineering and Design, Project Controls, Procurement, and Commissioning. Support functions such as Risk Assessment, Quality Management, HSE and the development of Environmental Impact Assessments are also an integral part of our services.

### Management systems

Operating under an ISO 9001 and ISO 14001 accredited quality and environmental management system, we strive to exceed expectations and to provide first class professional services. In addition, Verkis follows an ambitious safety management policy and an OHSAS 18001 accreditation of the safety management system is underway.

# NORTEK

Established in 1996, Nortek is a market leader in security and technical solutions – mainly focused on companies and institutions. We have two offices in Iceland (Akureyri and Reykjavik), and one in Norway (Drammen).

### Services

We offer comprehensive solutions for security issues including design, project management, installation, start-up and maintenance.

### Our services include:

- access control systems
- fire alarm systems
- gas alarm systems
- gates, barrier gates and security fences
- intrusion Alarm systems
- surveillance cameras systems
- fire extinguishers and fire-fighting systems
- back-up power systems
- wireless communication
- security
- annual inspections and services

### Servicing a range of countries

With our educated, well-trained team, and top brands and services, suppliers have started to look to us for support abroad, including services in Greenland, Norway, Saudi Arabia, Germany, Poland, Russia and the Canary Islands.

### Nordata

Nortek is affiliated with Nordata, who offer comprehensive solutions for the IT market, including:

- computer cabling material
- computer cabinets
- uninterruptible power supply (UPS)
- cooling systems
- advice, design and product management

COMPREHENSIVE SOLUTIONS FOR SECURITY ISSUES INCLUDING DESIGN, PROJECT MANAGEMENT, INSTALLATION, START-UP AND MAINTENANCE

## DYNJANDI

Dynjandi is a long-established pioneer in the field of workplace safety. We provide Icelandic workers with recognised safety equipment, personal protection equipment and work-clothes.

### History

Established in 1954, we have decades-long experience and unrivalled specialist knowledge. The company offers goods from many of the world's largest and best-known manufacturers of safety equipment, and for over 40 years equipment from Dynjandi has helped to prevent serious accidents in the workplace.

### Increasing safety

We have worked with the Administration of Occupational Safety and Health in Iceland, and with safety officers from leading Icelandic companies, to successfully encourage the increased use of safety equipment. This includes safety and occupational footwear, work and protective clothing, helmets, face guards and breathing masks.

Contact details  
 Dynjandi  
 Phone: +354 588-5080

Email: [verslun@dynjandi.is](mailto:verslun@dynjandi.is)

THE IMPORTANCE OF SAFETY EQUIPMENT CANNOT BE OVERESTIMATED, AND DYNJANDI CONTINUES ITS LEADERSHIP IN SAFETY ISSUES

## JOHAN RÖNNING

Established in 1933, Johan Rönning Inc. is the leading supplier of electrical products in Iceland.

### Services

We service the professional market with low, medium and high voltage products and services. Products range from cables and accessories, to spare parts and service for switchgears and filter banks. We also offer total solutions for the 400V distribution and DC systems, as well as control and protection devices.

### SINDRI

Under our brand name SINDRI we are a significant player in supplying the professional construction and industrial market. We offer hand- and power tools, air compressor solutions, welding solutions, gratings, spiral stairs, railings and garage doors.

### HEBRON

HEBRON is our brand name for professional clothing and security products.

The company provides its wide range of products in 11 different locations all around Iceland. In recent years we have serviced and supplied to leading contractor companies involved in projects in Greenland and Scandinavia.

### Key suppliers

Johan Rönning's key suppliers include ABB, Hager, Ericsson, Lapp Kabel, DeWalt, Atlas Copco and Lincoln Electric.

Our mission is 'to continue to be the prime driver on the professional electrical, industrial and construction market. To be recognised as a value added company that provides a broad range of high quality products and services to professional players in the market'.

# Your Business is Always on Our Mind

---

Our goal is to make sure your business gets the financial services it needs to be successful. We go the extra mile to understand the challenges and opportunities facing your business and work closely with you to provide financial solutions that will help your business to grow.

At Íslandsbanki, we have put together a team of experienced professionals with a deep understanding of the energy industry. Our energy business is built on Iceland's history of successfully harnessing geothermal and hydroelectric power. We utilize that knowledge to help leading industry players succeed in a competitive environment.

**Expertise Grows from Enthusiasm**

Hjortur Thor Steindorsson has years of experience in the energy industry, both domestically and internationally.

Hjortur is the Executive Director of Energy at Íslandsbanki.

**We Offer  
Good Service**
