Pending cases

Pending cases within the Internal Market Affairs Directorate at the end of 2008

The cases are listed by EFTA State and grouped by sector.
Within each sector, cases are sorted by case type:

Complaints (COM)	Anyone may submit a complaint against any of the EEA EFTA States. The Authority examines all complaints falling within its competence and passes on to the European Commission any complaints which fall within the competence of the Commission.
Non-notification of implementation of directives (NON)	Non-notification cases are opened when the EEA EFTA States have failed to adopt national measures to implement directives by the relevant compliance date.
Conformity assessments (CON)	Conformity assessment cases are opened on the Authority's own initiative in order to carry out a systematic assessment of conformity of the national measures notified by an EEA EFTA State with the provisions of a certain act they are intending to implement.
Incorrect implementation or application of EEA rules (INC)	Where the Authority has information that national legislation or practice might not be in compliance with EEA rules, and decides to examine the issue further, a so-called incorrect implementation/application case is opened at the Authority's own initiative. This could be e.g. regarding incorrect implementation of EEA rules, national rules or practices that are incompatible with EEA rules or misapplication of EEA rules or a failure to incorporate EEA regulations into national law.
Draft Technical Regulations (DTR)	The Authority examines draft technical regulations, which the EEA EFTA States are obliged to notify to the Authority. Such regulations concern products and information society services.
eCom (ECOM)	The national regulatory authorities in the EEA EFTA States have an obligation to notify draft regulatory decisions to the Authority in a number of specified instances before they can be adopted and put into effect in the national markets. The Authority has a duty to examine the draft measures in order to ensure their compatibility with EEA law.
Management tasks and reporting obligations (MTA)	Management tasks and reporting obligations include various administrative tasks concerning, for example, examinations relating to the telecommunications sector, or adoption of guidelines relating to product safety, summary reports of national reports on health and safety, or calculation and publication of thresholds applicable in the field of public procurement.
Inspections (INS)	The Authority performs on-the-spot investigations to verify that the EEA EFTA States comply with their obligations relating to, for example, food and feed safety and aviation security.

Action by the Authority lists the most important steps taken by the Authority in each case by the end of 2008.

The short title and description reflect the substance of the issue being examined in each case.
This description is not intended to give the position by the Authority or its Services.

Cases within the Internal Market Affairs Directorate that were closed by the Authority during 2008

The cases are listed by EFTA State and grouped by sector.
Within each sector, cases are sorted by case type:

Complaints (COM)	Anyone may submit a complaint against any of the EEA EFTA States. The Authority examines all complaints falling within its competence and passes on to the European Commission any complaints which fall within the competence of the Commission.
Non-notification of implementation of directives (NON)	Non-notification cases are opened when the EEA EFTA States have failed to adopt national measures to implement directives by the relevant compliance date.
Conformity assessments (CON)	Conformity assessment cases are opened on the Authority's own initiative in order to carry out a systematic assessment of conformity of the national measures notified by an EEA EFTA State with the provisions of a certain act they are intending to implement.
Incorrect implementation or application of EEA rules (INC)	Where the Authority has information that national legislation or practice might not be in compliance with EEA rules, and decides to examine the issue further, a so-called incorrect implementation/application case is opened at the Authority's own initiative. This could be e.g. regarding incorrect implementation of EEA rules, national rules or practices that are incompatible with EEA rules or misapplication of EEA rules or a failure to incorporate EEA regulations into national law.
Draft Technical Regulations (DTR)	The Authority examines draft technical regulations, which the EEA EFTA States are obliged to notify to the Authority. Such regulations concern products and information society services.
eCom (ECOM)	The national regulatory authorities in the EEA EFTA States have an obligation to notify draft regulatory decisions to the Authority in a number of specified instances before they can be adopted and put into effect in the national markets. The Authority has a duty to examine the draft measures in order to ensure their compatibility with EEA law.
Management tasks and reporting obligations (MTA)	Management tasks and reporting obligations include various administrative tasks concerning, for example, examinations relating to the telecommunications sector, or adoption of guidelines relating to product safety, summary reports of national reports on health and safety, or calculation and publication of thresholds applicable in the field of public procurement.
Inspections (INS)	The Authority performs on-the-spot investigations to verify that the EEA EFTA States comply with their obligations relating to, for example, food and feed safety and aviation security.

The short title and description reflect the substance of the issue being examined in each case.
This description is not intended to give the position by the Authority or its Services.
